PROFILE

Final-year CSE student at Heritage Institute of Technology, Kolkata with 2 internships and a focus on node-based workflow UIs and AI automation. Built a drag-and-drop WhatsApp Flow Builder at QuickStay and a full-stack AI Agent orchestration platform using Gemini API and Convex. Targeting frontend and full-stack SDE roles in product-focused companies.

EDUCATION

Heritage Institute of Technology, Kolkata **2023 – 2027**
Bachelor of Technology in Computer Science Engineering (Final Year)

EXPERIENCE

QuickStay Private Limited **Aug 2025 – Oct 2025**
React Developer Intern *Remote*

- Built a drag-and-drop **WhatsApp Flow Builder** UI enabling users to visually design automated messaging workflows, supporting 10+ node types including message, condition, loop, and AI nodes.
- Implemented node-based canvas interactions using **React Flow**, managing complex flow state and dynamic edge connections across the builder.
- Developed a reusable component library with React.js and Tailwind CSS for the flow editor, ensuring consistency across the interface.
- **Tech Stack:** React.js, React Flow, JavaScript, Tailwind CSS

Brainzima Innovation Pvt. Ltd. **Dec 2024 – Jan 2025**
Frontend Developer Intern *Remote*

- Built multi-page portfolio websites for 2 clients to showcase their work online, including sections for project galleries, about, and contact.
- Delivered fully responsive layouts across mobile and desktop using Tailwind CSS and JavaScript.
- **Tech Stack:** HTML, CSS, JavaScript, Tailwind CSS

PROJECTS

AI Agent Builder Platform **March 2026**
Full-Stack AI Workflow Orchestration Platform

- Built a full-stack platform for visually designing and executing AI agents via a drag-and-drop node-based workflow builder with triggers, conditions, loops, and API integrations.
- Integrated **Google Gemini API** for AI agent execution and **Convex** for real-time backend, with secure authentication via Clerk.
- Architected the frontend using **React Flow** for canvas interactions, enabling complex multi-node agent pipelines.
- **Tech Stack:** Next.js, React.js, React Flow, Tailwind CSS, Convex, Clerk, Gemini API

Food Recipe Application **Aug 2025**
Full Stack Developer (MERN)

- Built a full-stack MERN application for creating, editing, deleting, and browsing recipes with image upload support.
- Designed and developed REST APIs using Node.js and Express.js backed by MongoDB, with Multer for image handling.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Multer, Tailwind CSS

TECHNICAL SKILLS

- **Languages:** JavaScript, C, C++, HTML5, CSS3, SQL
- **Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap, React Flow
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MongoDB, MySQL
- **Tools & Platforms:** Git, GitHub, Docker, VS Code, Clerk, Convex
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming

EXTRACURRICULAR ACTIVITIES

BloodConnect Foundation **March 2025 – Present**
Collaboration & Awareness Executive (Kolkata Team)

- Coordinated awareness campaigns and outreach initiatives promoting voluntary blood donation across student institutions in Kolkata.
